

How to Score Your Practice Tests

For each subject area in the practice test, convert your raw score, or the number of questions you answered correctly, to a scaled score using the table below. To get your raw score for Evidence-Based Reading and Writing, add the total number of Reading questions you answered correctly to the total number of Writing questions you answered correctly; for Math, add the number of questions you answered correctly for the Math (No Calculator) and Math (Calculator) sections.
